

# CluePoints Intelligent Analytics Platform

Powered by Machine Learning (ML) & Artificial Intelligence (AI)

Streamline complex data and analytics for the extensive study portfolios, vast data silos, and diverse end-user needs of biopharmaceutical companies and CROs.

## THE NEED

- ✓ Categorize patient data accurately and uniformly
- ✓ Clean clinical trial data through early identification of data anomalies
- ✓ Review clinical and medical data to discover safety and efficacy trends

## THE SOLUTION

Automated Medical Coding

Enhanced Data Querying

Intelligent Clinical Signal Detection

Automate the dictionary coding of medical terms

Improve the precision of automatically identified data anomalies

Identify relevant clinical signals within one development program
